---

I'm an **adaptive learner**, great **improviser** and work **efficiently fast**. And usually, if I work with you, you'll receive more than you expect

## My credo in product design is pretty simple.

Before we show the interesting layout, shape and color, first we need to craft what we have, to be a thing that is helpful, mature, understandable & easy to use without sacrificing their true aim. Then, the beauty will follow later.
